

Fits on Outdoor Panel
Choice of two lengths
For tables 90 or 110 cm high

InBetween safer together

Extender 90 / Extender 110

for Outdoor Panel

Due to Coronavirus, our health and wellbeing is very much at the forefront of our daily lives. We realise that we must remain alert in minimising the risk of contamination for our guests, our colleagues and ourselves.

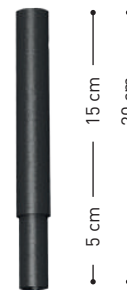

InBetween Outdoor Panel Extender is a practical and flexible solution to place your existing InBetween Outdoor Panel between standing tables and drinks tables on the Terrace.

InBetween Outdoor Panel Extender is available in two versions. The Extender 90 makes the Outdoor Panel suitable for tables with height of 90 cm, Whilst the 110 for a height of 110 cm.

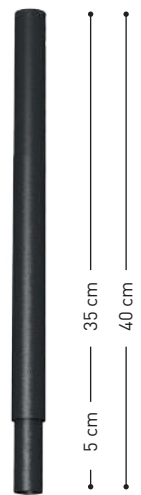

InBetween Outdoor Panel Extender is supplied in the same finish as the outdoor panel frame, making it match the existing frame.

InBetween Outdoor Panel Extender is easy to assemble as an addition to the existing powdercoated tube frame.

InBetween Outdoor Panel Extender comes as a set that allows you to increase two Outdoor Panels to the required height.*
